All data and information in this report are believed to be accurate and have come from sources believed to be reliable. However, Queensland Treasury does not guarantee or represent that the data and the information are accurate, up to date or complete, and disclaims liability for all claims, losses, damages or costs of whatever nature and howsoever occurring, arising as a result of relying on the data and information, regardless of the form of action, whether in contract, tort (including negligence), breach of statutory duty or otherwise.

Region overview

The resident profiles provide details on a range of topics for people who live in the region.

Central Ward is comprised of six statistical area level 2s (SA2's) either in full or in part. The percentages refer to the percentage of the SA2's population that is located within the Central Ward.

The six SA2's are:

Brisbane City (86.56%), Fortitude Valley (100.00%), Kelvin Grove - Herston (25.89%), New Farm (100.00%), Newstead - Bowen Hills (100.00%) and Spring Hill (100.00%).

Statistics stated in this report at an SA2 level are only for the part of the SA2 that is located within the Central Ward. In some instances, where the percentage of an SA2's population within a ward is small, some SA2 table values have been adjusted to the cell value '<5'. Caution should be used when making inferences from these results.

Central Ward has a total area of 11.3 km², with an average daily temperature range of 14.7 °C to 25.3 °C and an average rainfall of 1,125 mm each year.

Data for Central Ward (Electoral Ward boundaries, 2016) are based on Australian Bureau of Statistics (ABS), Australian Statistical Geography Standard (ASGS), July 2011.

Queensland has a total area of 1,734,238.8 km², with an average daily temperature range of 16.4 °C to 30.0 °C and an average rainfall of 636 mm each year.

Data for Queensland are based on Australian Bureau of Statistics (ABS), Australian Statistical Geography Standard (ASGS), July 2011.

Abbreviations and explanatory notes are provided at the rear of this profile.

Demography

Estimated resident population

The estimated resident population (ERP) figure is the official population estimate, and represents the best possible estimate of the resident population. For sub-state geographies, ERP figures are updated annually using a model which includes administrative data that indicate population change, such as registered births and deaths, dwelling approvals, Medicare enrolments and electoral enrolments. Data in this profile topic are updated annually with an approximate delay of 9 months after the reporting period. The next planned update is in April 2017.

As at 30 June 2015, the estimated resident population for Central Ward was

45,794 persons

Central Ward

- ERP of 45,794 persons as at 30 June 2015
- Average annual growth rate of 2.2% over five years
- Average annual growth rate of 2.7% over ten years
- Within the region, New Farm SA2 had the largest population with 13,822 persons
- Within the region, Kelvin Grove - Herston* SA2 had the fastest population growth over five years with 3.4%

Queensland

- ERP of 4,778,854 persons as at 30 June 2015
- Average annual growth rate of 1.6% over five years
- Average annual growth rate of 2.0% over ten years

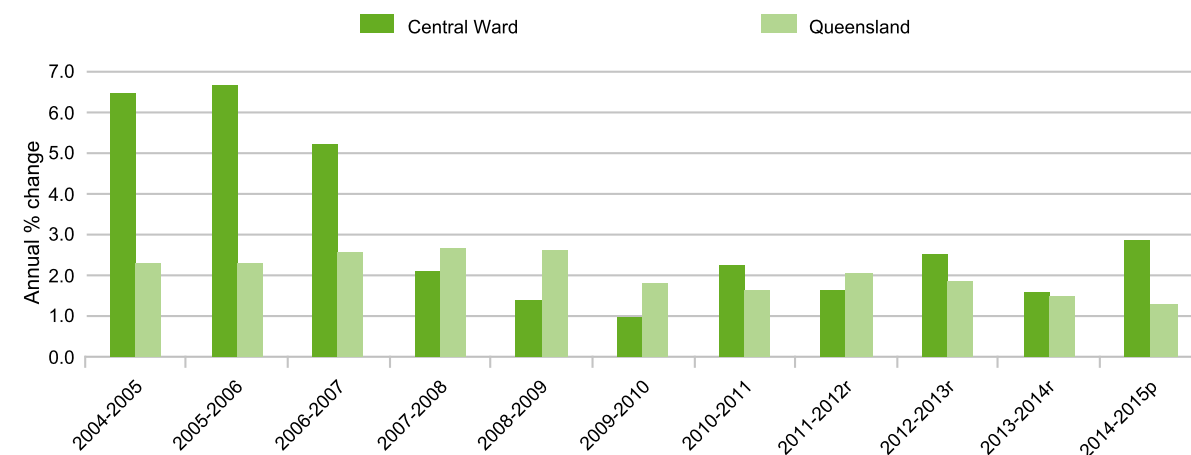

Table 1 Estimated resident population by SA2, Central Ward and Queensland

Population by age and sex

The estimated resident population (ERP) figure is the official population estimate, and represents the best possible estimate of the resident population. For sub-state geographies, ERP figures are updated annually using a model which includes administrative data that indicate population change, such as registered births and deaths, dwelling approvals, Medicare enrolments and electoral enrolments. Data in this profile topic are updated annually with an approximate delay of 12 months after the reporting period. The next planned update is in September 2017.

As at 30 June 2015, the proportion of the estimated resident population aged 65 years and over for Central Ward was

8.4%

Central Ward

- 6.7% aged 0–14 years as at 30 June 2015
- 85.0% aged 15–64 years
- 8.4% aged 65+ years
- Within the region, Kelvin Grove - Herston* SA2 had the largest percentage of persons aged 0–14 with 12.0%
- Within the region, Fortitude Valley SA2 had the largest percentage of persons aged 15–64 with 90.6%
- Within the region, New Farm SA2 had the largest percentage of persons aged 65+ with 12.4%

Queensland

- 19.8% aged 0–14 years as at 30 June 2015
- 65.9% aged 15–64 years
- 14.4% aged 65+ years

Table 2 Estimated resident population by age and SA2, Central Ward and Queensland, 30 June 2015p

Median age

The median age is the age at which half the population is older and half is younger. These median age estimates have been calculated by the ABS and Queensland Treasury using single year of age estimated resident population data. Data in this profile topic are updated annually with an approximate delay of 12 months after the reporting period. The next planned update is in September 2017.

As at 30 June 2015, the median age for Central Ward was

32.5 years

Central Ward

- Median age of 32.5 years as at 30 June 2015
- Increase of 0.2 years from median age of 32.3 years as at 30 June 2005
- Within the region, New Farm SA2 had the highest median age of 35.5 years
- Within the region, Fortitude Valley SA2 had the largest increase in median age from 30 June 2005 to 30 June 2015 with 2.7 years

Queensland

- Median age of 36.9 years as at 30 June 2015
- Increase of 1.0 years from median age of 35.9 years as at 30 June 2005

Table 3 Median age by SA2, Central Ward and Queensland

Ward / SA2 / State	As at 30 June			Change
	2005	2010	2015p	2005–2015p
	— years —			years

Population projections

The 2015 edition of the Queensland Government population projections are generated by applying assumptions regarding future trends in the components of population change (fertility, mortality and migration) and the latest planning and development intelligence available. Data presented in this profile topic are based on the medium series and are updated twice every five years. The next planned update is in January 2018.

From 2011 to 2036, the population for Central Ward is projected to increase from

**42,080 persons to
90,075 persons**

Central Ward

- Population projected to be 90,075 persons as at 30 June 2036
- Increase of 3.1% per year over 25 years
- Within the region, Newstead - Bowen Hills SA2 is projected to have the largest population as at 30 June 2036 with 27,904 persons
- Within the region, Fortitude Valley SA2 is projected to have the fastest growth in population from 30 June 2011 to 2036 with an average annual rate of 5.4% per year

Queensland

- Population projected to be 6,763,153 persons as at 30 June 2036
- Increase of 1.7% per year over 25 years

Table 4 Projected population by SA2, Central Ward and Queensland

Ward / SA2 / State	As at 30 June						Average annual growth rate

Births and deaths

Birth and death statistics are an estimate of the number of births and deaths that have been registered in Australia's state and territory Registries of Births, Deaths and Marriages over a calendar year. These estimates are useful for two distinct purposes – use as a component of population growth and for analysis of fertility and mortality. Data in this profile topic are updated annually with an approximate delay of 12 months after the reporting period. The next planned update is in November 2017.

The number of registered births in 2015 to mothers with a usual residence in Central Ward was

416 births

Central Ward

- 416 registered births in 2015
- 231 registered deaths
- Within the region, Newstead - Bowen Hills SA2 had the largest crude birth rate with 10.2 births per 1,000 population

Queensland

- 61,745 registered births in 2015
- 29,782 registered deaths

Table 5 Registered births and deaths by SA2, Central Ward and Queensland, 2015

Migration 1 year ago

Migration one year ago compares the usual address of household members on Census Night 2011 (9 August 2011) with their usual address one year earlier (i.e. 9 August 2010). This is based on persons by place of usual residence.

The percentage of persons in Central Ward with a different address one year ago was

31.6%

Central Ward

- 21,964 persons usually resided in the same address as one year ago
- 12,350 persons (or 31.6%) usually resided in a different address one year ago
- Within the region, Fortitude Valley SA2 had the largest percentage of persons with a different usual address one year ago with 35.8%

Queensland

- 3,278,187 persons usually resided in the same address as one year ago
- 764,695 persons (or 17.9%) usually resided in a different address one year ago

Table 6 Place of usual residence one year ago^(a) by SA2, Central Ward and Queensland, 2011

Migration 5 years ago

Migration five years ago compares the usual address of household members on Census Night 2011 (9 August 2011) with their usual address five years earlier (i.e. 9 August 2006). This is based on persons by place of usual residence.

The percentage of persons in Central Ward with a different address five years ago was

63.6%

Central Ward

- 8,931 persons usually resided in the same address as five years ago
- 24,291 persons (or 63.6%) usually resided in a different address five years ago
- Within the region, Newstead - Bowen Hills SA2 had the largest percentage of persons with a different usual address five years ago with 67.7%

Queensland

- 1,958,914 persons usually resided in the same address as five years ago
- 1,815,132 persons (or 45.0%) usually resided in a different address five years ago

Country of birth

Country of birth has been derived from the 2011 Census of Population and Housing question 'In which country was the person born?'. This is based on persons by place of usual residence.

The top five English speaking backgrounds and non-English speaking backgrounds for Central Ward were:

English Speaking	Non-English Speaking
1. United Kingdom, Channel Islands and Isle of Man (5.3%)	1. Korea, Republic of (South) (2.2%)
2. New Zealand (3.8%)	2. China (excl. SARs and Taiwan) (2.0%)
3. United States of America (1.2%)	3. India (1.6%)
4. Ireland (1.1%)	4. Italy (0.9%)
5. South Africa (0.9%)	5. Malaysia (0.9%)

Central Ward

- 13,609 persons (or 34.5%) were born overseas
- Within the region, Brisbane City* SA2 had the largest number of persons born overseas with 3,355
- Within the region, Brisbane City* SA2 had the largest percentage of persons born overseas with 44.5%

Queensland

- 888,636 persons (or 20.5%) were born overseas

Proficiency in spoken English

Proficiency in spoken English has been derived from the 2011 Census of Population and Housing question '*How well does the person speak English?*', if the person speaks a language other than English at home. This topic relates to persons who stated they were born overseas as at Census Night 2011. This is based on overseas-born persons by place of usual residence.

The top five non-English languages spoken at home for the total population of Central Ward were:

Language spoken

1. Chinese (4.8%)
2. Korean (2.0%)
3. Spanish (1.6%)
4. Indo Aryan (1.6%)
5. Italian (1.5%)

Central Ward

- 7,091 persons (or 52.1%) stated they spoke a language other than English at home
- Within the region, Brisbane City* SA2 had the largest number of overseas-born persons who stated they spoke a language other than English at home with 2,104
- Within the region, Kelvin Grove - Herston* SA2 had the largest percentage of overseas-born persons who stated they spoke a language other than English at home with 65.1%

Queensland

- 319,949 persons (or 36.0%) stated they spoke a language other than English at home

Religious affiliation

Religious affiliation has been derived from the 2011 Census of Population and Housing question asking 'What is the person's religion?' This is based on persons by place of usual residence.

The top five religious affiliations for Central Ward were:

Religious affiliation

1. No Religion (30.5%)
2. Catholic (23.7%)
3. Anglican (10.9%)
4. Buddhism (3.3%)
5. Uniting Church (2.9%)

Central Ward

- 18,100 persons (or 45.9%) stated they were affiliated with a Christian religion
- Within the region, Newstead - Bowen Hills SA2 had the largest percentage of persons who stated they were affiliated with a Christian religion with 50.4%

Queensland

- 2,785,084 persons (or 64.3%) stated they were affiliated with a Christian religion

Family composition

In the context of the 2011 Census of Population and Housing, families are classified in terms of the relationships that exist between a single family reference person and each other member of that family. The family composition variable distinguishes between different types of families based on the presence or absence of couple relationships, parent-child relationships, child dependency relationships or other familial relationships, in that order of preference. This is based on families by place of usual residence.

The percentage of total families in Central Ward which were couple families with children was

22.4%

Central Ward

- 7,859 families
- 22.4% of total families were couple families with children
- Within the region, New Farm SA2 had the largest number of couple families with children with 627
- Within the region, Kelvin Grove - Herston* SA2 had the largest percentage of one-parent families with 12.9%

Queensland

- 1,148,179 families
- 42.8% of total families were couple families with children

Household composition

In the context of the 2011 Census of Population and Housing, a household is defined as one or more persons, at least one of whom is at least 15 years of age, usually resident in the same private dwelling. Household composition describes the type of household within a dwelling, whether a family is present or not and whether or not other unrelated household members are present. This is based on occupied private dwellings.

Central Ward

- 16,979 households
- 45.5% of total households were one family households
- Within the region, Kelvin Grove - Herston* SA2 had the largest percentage of one family households

Queensland

- 1,547,304 households
- 70.7% of total households were one family households

The percentage of one family households in Central Ward was

45.5%

Dwellings by dwelling structure

In general terms, a dwelling is a structure which is intended to have people live in it, and which is habitable on Census Night. The dwelling structure variable classifies the structure of private dwellings enumerated in the 2011 Census of Population and Housing. This information is determined by the Census collector and is based on occupied private dwellings.

The percentage of total occupied private dwellings in Central Ward which were separate houses was

14.7%

Central Ward

- 2,502 occupied private dwellings (or 14.7%) were separate houses
- Within the region, New Farm SA2 had the largest number of separate houses with 1,161
- Within the region, Fortitude Valley SA2 had the largest percentage of apartments with 94.2%

Queensland

- 1,215,303 occupied private dwellings (or 78.5%) were separate houses

Dwellings by tenure type

In general terms, a dwelling is a structure which is intended to have people live in it, and which is habitable on Census Night. The tenure type variable describes whether a household rents or owns the dwelling in which they were enumerated on Census Night 2011, or whether the household occupies it under another arrangement. This is based on occupied private dwellings.

The percentage of total occupied private dwellings in Central Ward which were fully owned was

15.0%

Central Ward

- 2,545 occupied private dwellings (or 15.0%) were fully owned
- Within the region, New Farm SA2 had the largest number of fully owned dwellings with 1,097
- Within the region, Fortitude Valley SA2 had the largest percentage of rented dwellings with 70.3%

Queensland

- 448,617 occupied private dwellings (or 29.0%) were fully owned

Number of motor vehicles per dwelling

The number of motor vehicles variable records the number of registered motor vehicles, which are owned or used by members of a household, and which are garaged or parked near the occupied private dwelling on Census Night 2011. This is based on occupied private dwellings by place of enumeration.

The percentage of dwellings in Central Ward with 3 or more motor vehicles was

5.3%

Central Ward

- 23.1% of dwellings had no motor vehicles
- 5.3% of dwellings had 3 or more motor vehicles
- Within the region, Spring Hill SA2 had the highest percentage of dwellings which had no motor vehicles with 31.2%
- Within the region, Kelvin Grove - Herston* SA2 had the highest percentage of dwellings which had 3 or more motor vehicles with 9.2%

Queensland

- 7.2% of dwellings had no motor vehicles
- 17.3% of dwellings had 3 or more motor vehicles

Non-school qualification by field of study

Non-school qualification information describes the highest non-school qualification (e.g. bachelor degree, diploma) completed as stated in the 2011 Census of Population and Housing. This information is based on persons aged 15 years and over by place of usual residence.

The largest non-school qualification field of study in Central Ward was

Management and Commerce (21.5%)

Central Ward

- 5,744 persons (or 21.5%) with a non-school qualification studied in the field of Management and Commerce
- 3,338 persons (or 12.5%) with a non-school qualification studied in the field of Society and Culture

Queensland

- 314,629 persons (or 16.8%) with a non-school qualification studied in the field of Engineering and Related Technologies
- 310,801 persons (or 16.6%) with a non-school qualification studied in the field of Management and Commerce

Vocational education and training students

Vocational education and training (VET) provides skills and knowledge for work. VET is undertaken in a wide range of subject areas and skill levels, and is provided by schools, technical colleges, technical and further education (TAFE) institutes, universities and various other providers. Data on VET students are collected by the National Centre for Vocational Education Research (NCVER) from these training providers. Data in this profile topic are updated annually with an approximate delay of 12 months after the reporting period. The next planned update is in December 2016.

The number of VET students in Central Ward in 2014 was

2,813 students

Central Ward

- 2,813 VET students in 2014
- 67.5% of total VET students commenced
- Within the region, Brisbane City* SA2 had the largest percentage of commencing students with 72.2%
- Within the region, New Farm SA2 had the largest percentage of continuing students with 39.8%

Queensland

- 275,217 VET students in 2014
- 56.5% of total VET students commenced

Persons with a profound or severe disability

Persons with a profound or severe disability has been derived from the 2011 Census of Population and Housing variable 'Core activity need for assistance'. Persons with a profound or severe disability are defined as needing help or assistance in one or more of the three core activity areas of self-care, mobility and communication because of a long term health condition (six months or more), a disability (lasting six months or more), or old age. This is based on persons by place of usual residence.

The percentage of persons in Central Ward in need of assistance with a profound or severe disability was

2.8%

Central Ward

- 1,093 persons (or 2.8%) in need of assistance with a profound or severe disability
- Within the region, New Farm SA2 had the highest percentage of persons in need of assistance with a profound or severe disability with 5.2%
- Within the region, Brisbane City* SA2 had the lowest percentage of persons in need of assistance with a profound or severe disability with 0.9%

Queensland

- 192,019 persons (or 4.4%) in need of assistance with a profound or severe disability

Voluntary work

Voluntary work undertaken for an organisation or group has been derived from the 2011 Census of Population and Housing question *'In the last twelve months did the person spend any time doing voluntary work through an organisation or group?'* The variable is based on persons aged 15 years and over by place of usual residence.

Central Ward

- 6,709 persons (or 18.2%) undertook voluntary work
- Within the region, Kelvin Grove - Herston* SA2 had the largest percentage of persons who undertook voluntary work with 22.9%

Queensland

- 645,543 persons (or 18.7%) undertook voluntary work

Table 24 Voluntary work by SA2, Central Ward and Queensland, 2011

Aged care services

Information on aged care services are provided by the Commonwealth Department of Health and Ageing. Information are based on the location of the service, rather than the region in which the service is delivered. In some instances, aged care services may have provided the address information of their approved provider in place of the address information of the individual aged care service. Users should be aware of this limitation when using these data. Aged care services are subsidised by the Australian Government under the Aged Care Act 1997. Data in this profile topic are updated annually with an approximate delay of 12 months after the reporting period. The next planned update is in November 2017.

The number of aged care service operational places in Central Ward as at 30 June 2016 was

582 places

Central Ward

- 11 aged care services as at 30 June 2016
- 582 aged care service operational places
- Within the region, New Farm SA2 had the largest number of aged care service operational places with 297

Queensland

- 954 aged care services as at 30 June 2016
- 51,145 aged care service operational places

Table 25 Aged care services by SA2, Central Ward and Queensland, 30 June 2016

The Index of Relative Socio-Economic Disadvantage

Socio-Economic Indexes for Areas (SEIFA) is a summary measure of the social and economic conditions of geographic areas across Australia. SEIFA, which comprises a number of indexes, is generated by ABS from the Census of Population and Housing. In 2011 an Index of Relative Socio-Economic Disadvantage was produced, ranking geographical areas in terms of their relative socio-economic disadvantage. The index focuses on low-income earners, relatively lower education attainment, high unemployment and dwellings without motor vehicles. Low index values represent areas of most disadvantage and high values represent areas of least disadvantage. This is based on persons by place of usual residence.

Central Ward

- 42.5% in least disadvantaged quintile
- 7.4% in most disadvantaged quintile
- Within the region, Newstead - Bowen Hills SA2 had the largest percentage of persons in the least disadvantaged quintile with 83.1%

Queensland

- 20.0% in least disadvantaged quintile
- 20.0% in most disadvantaged quintile

The percentage of persons in Central Ward in the least disadvantaged quintile was

42.5%

Table 27 Population by Index of Relative Socio-Economic Disadvantage quintiles^(a) by SA2, Central Ward and Queensland, 2011

Economy

Selected medians and averages

These selected medians and averages have been derived by using data based on the 2011 Census of Population and Housing and may not reflect medians that have been derived by administrative data and published in other profile topics. Where applicable, these estimates are based on place of usual residence.

The median total personal income for Central Ward was

\$928 per week

Central Ward

- Median mortgage repayment of \$2,329 per month
- Average household size of 1.9 persons per dwelling
- Within the region, Newstead - Bowen Hills SA2 had the highest median weekly family income with \$2,662 per week

Queensland

- Median mortgage repayment of \$1,850 per month
- Average household size of 2.6 persons per dwelling

Table 29 Selected medians and averages by SA2, Central Ward and Queensland, 2011

Median rent

Median rent estimates have been derived by Queensland Treasury using rental bond lodgements sourced by the Residential Tenancies Authority (RTA). Medians are only calculated where there are 10 or more lodgements over the 12 month period. Data in this profile topic are updated quarterly with an approximate delay of 3 months after the reporting period. The next planned update is in April 2017.

The median rent in Central Ward for a 3 bedroom house in the 12 months ending 31 December 2016 was

\$600 per week

Central Ward

- Median rent of \$500 per week for a 2 bedroom flat/unit in the 12 months ending 31 December 2016
- Median rent of \$600 per week for a 3 bedroom house

Queensland

- Median rent of \$350 per week for a 2 bedroom flat/unit in the 12 months ending 31 December 2016
- Median rent of \$350 per week for a 3 bedroom house

Total personal income

Total personal income has been derived from the 2011 Census of Population and Housing question '*What is the total of all wages/salaries, government benefits, pensions, allowances and other income a person usually receives?*'. Median total personal income estimates incorporate medians calculated by both ABS and Queensland Treasury. The variable is based on persons aged 15 years and over by place of usual residence.

The median total personal income in Central Ward was

\$48,260 per year

Central Ward

- Median total personal income of \$48,260 per year
- Within the region, Newstead - Bowen Hills SA2 had the highest median total personal income with \$60,320 per year
- Within the region, Kelvin Grove - Herston* SA2 had the lowest median total personal income with \$30,848 per year

Queensland

- Median total personal income of \$30,524 per year

Total family income

Total family income is the sum of the total personal incomes of each family member present in the household on 2011 Census Night. Family income only applies to classifiable families in occupied private dwellings. Low-income families have been defined as families in occupied private dwellings whose family income was less than \$600 per week or less than \$31,200 per year. Median total family income estimates incorporate medians calculated by both ABS and Queensland Treasury.

The median total family income in Central Ward was

\$123,692 per year

Central Ward

- 529 low-income families (6.7%)
- Median total family income of \$123,692 per year
- Within the region, Newstead - Bowen Hills SA2 had the highest median total family income with \$138,424 per year
- Within the region, Kelvin Grove - Herston* SA2 had the lowest median total family income with \$100,218 per year

Queensland

- 149,707 low-income families (13.0%)
- Median total family income of \$75,556 per year

Unemployment and labour force

Estimates of unemployment and labour force are produced by the Australian Government Department of Employment. The estimates are calculated by utilising administrative data such as Centrelink Newstart and Youth Allowance (Other) recipients as well as ABS labour force estimates. Data in this profile topic are updated quarterly with an approximate delay of 3 months after the reporting period. The next planned update is in March 2017.

The unemployment rate in Central Ward at September quarter 2016 was

4.4%

Central Ward

- 1,418 unemployed persons in September quarter 2016
- Unemployment rate of 4.4%
- Within the region, Fortitude Valley SA2 had the highest unemployment rate of 7.2%
- Within the region, Newstead - Bowen Hills SA2 had the lowest unemployment rate of 2.9%

Queensland

- 154,452 unemployed persons in September quarter 2016
- Unemployment rate of 6.1%

Employment by industry

Employment by industry has been derived from the 2011 Census of Population and Housing data. A person's industry of employment was classified based on responses to a range of questions from the Census and is applicable to persons aged 15 years and over who work. This is based on place of usual residence.

The top five industry subdivisions of employment for Central Ward were:

1. Professional, Scientific and Technical Services (except Computer System Design and Related Services) (15.4%)
2. Food and Beverage Services (7.4%)
3. Public Administration (5.5%)
4. Hospitals (5.0%)
5. Other Store-Based Retailing (4.2%)

Central Ward

- 18.5% of employed persons worked in Professional, scientific and technical services industry
- 10.8% of employed persons worked in Health care and social assistance industry
- Highest specialisation ratio of 2.84 in Professional, scientific and technical services industry

Queensland

- 11.9% of employed persons worked in Health care and social assistance industry
- 10.7% of employed persons worked in Retail trade industry

Employment by occupation

Employment by occupation has been derived from the 2011 Census of Population and Housing data. A person's occupation of employment was classified based on responses to a range of questions from the Census and is applicable to persons aged 15 years and over who work. This is based on place of usual residence.

The top five occupation sub-major groups of employment for Central Ward were:

1. **Business, Human Resource and Marketing Professionals (10.8%)**
2. **Specialist Managers (8.6%)**
3. **Design, Engineering, Science and Transport Professionals (8.1%)**
4. **Health Professionals (6.2%)**
5. **Hospitality, Retail and Service Managers (4.6%)**

Central Ward

- 37.9% of employed persons worked in Professionals occupation
- 15.6% of employed persons worked in Managers occupation
- Highest specialisation ratio of 2.00 in Professionals occupation

Queensland

- 18.9% of employed persons worked in Professionals occupation
- 14.9% of employed persons worked in Technicians and trades workers occupation

Families with children with no parent employed

Families with children with no parent employed have been derived from the 2011 Census of Population and Housing data and defined as either one parent families where the parent was either unemployed or not in the labour force or couple families where both parents were either unemployed or not in the labour force. This is based on families with children under 15 years of age.

The percentage of families with children under 15 years of age and no parent employed in Central Ward was

8.9%

Central Ward

- 136 families with children under 15 years of age and no parent employed (8.9%)
- Within the region, Kelvin Grove - Herston* SA2 had the highest percentage of families with no parent employed (17.0%)

Queensland

- 62,171 families with children under 15 years of age and no parent employed (13.5%)

Industry and development

Building approvals

Information on building approvals are compiled by the ABS, and are collected from sources such as local government authorities and other principal certifying authorities. The estimates for any month may be revised or corrected in later months. This can occur as a result of corrections made by a provider of data, the late provision of approval records and, occasionally, by approvals being identified after construction work has commenced. Data in this profile topic are updated monthly with an approximate delay of 2 months after the reporting period. The next planned update is in February 2017.

The number of new houses approved in Central Ward in the 12 months ending 30 November 2016 was

33 approvals

Central Ward

- 33 approved new houses in the 12 months ending 30 November 2016
- \$665.2 million of building value in residential building approvals
- Within the region, Brisbane City* SA2 had the largest value of residential building approvals with \$382.1 million
- Within the region, Brisbane City* SA2 had the largest value of non-residential building approvals with \$494.0 million

Queensland

- 24,410 approved new houses in the 12 months ending 30 November 2016
- \$14,221.3 million of building value in residential building approvals

Residential lot registrations

Lot registrations data provide an indication of the volume of new lots developed and intended for residential purposes. Once a subdivisional plan has been certified by local government, it is lodged with the Department of Natural Resources and Mines (DNRM) for registration of title. For more information refer to the [Residential land development activity profiles](#).

Data in this profile topic are updated quarterly with an approximate delay of 6 months after the reporting period. The next planned update is in March 2017.

The number of residential lot registrations in Central Ward in the 12 months ending 30 June 2016 was

402 registrations

Central Ward

- 402 residential lot registrations in the 12 months ending 30 June 2016
- 402 urban residential lot registrations
- Within the region, Newstead - Bowen Hills SA2 had the largest number of residential lot registrations with 192

Queensland

- 31,176 residential lot registrations in the 12 months ending 30 June 2016
- 29,223 urban residential lot registrations

Explanatory notes

Profile explanatory notes

Australian Statistical Geography Standard (ASGS)

A geographical framework covering all spatial areas of Australia and its external territories. The ASGS was developed by the ABS to allow statistics from different collections to be spatially comparable. The ASGS replaced the Australian Standard Geographical Classification (ASGC).

Average annual growth rate

It is calculated as a percentage using the formula below, where P_0 is the population at the start of the period, P_n is the population at the end of the period and n is the length of the period between P_n and P_0 in years.

$$\left[\left(\frac{P_n}{P_0} \right)^{\frac{1}{n}} - 1 \right] \times 100$$

For example, to calculate the average annual rate of population change from 2002 to 2012, n is ten, P_0 is the population in 2002 and P_n is the population in 2012.

Cell confidentialisation

This profile utilises two types of data confidentialisation.

1. Source data confidentialisation - This refers to datasets that have been confidentialised by the data custodians. For example census data supplied by the ABS have small cell counts of 1 or 2 confidentialised to 0 or 3 and a small random adjustment made to all data to avoid any risk of releasing identifiable information. Caution should therefore be used when interpreting data where the cell count is small.
2. Concordance confidentialisation - This refers to datasets that have been concorded to a new geography and the resulting cell count is small. No reliance should be placed on these cell counts and as such have been confidentialised. Tables utilising this type of confidentialisation will report the cell as less than a specific value (for example <5).

Census 2011 data

Census data have 'introduced random error' to ensure no data are released which could risk identifying individuals. As such, cells containing very small counts should be treated with extreme caution.

Census undercount

Due to the size and complexity of the Census of Population and Housing, whenever a Census is conducted it is inevitable that some people will be missed and some will be counted more than once. After each Census, the Australian Bureau of Statistics conduct a Post Enumeration Survey to estimate the number of people who should have been counted in the Census and the actual Census counts. It is important to note, that all Census data reported in this profile do not have any adjustments made for Census undercount and readers should keep this in mind when making inferences from the data.

Concordances and concorded data

A concordance, in statistical terms, is a product that allows a user to convert data from one geographical region (under which data have been collected) to a new geographical region. In order to convert data from one geographical boundary to another, each region in the new boundary is assigned percentages of data from the old regions. These percentages in the concordance can be constructed using any number of variables. This profile utilises a population based concordance (estimated resident population) at a specific point in time (2011). This type of concordance is useful when concording demographic based datasets such as labour force and family composition on a usual resident basis with time periods at or around 2011. It does not work as well when concording data on different counting methods (such as counts by place of work), non-population based datasets (such as business counts) or datasets collected at different time periods (such as data collected in 2001). Caution should therefore be used when interpreting non-resident based datasets that have been concorded.

One major assumption that is necessary to make when concording data is that the data (for example unemployed persons) are proportionately distributed across the region the same as total resident population (as total resident population is the variable used to derive the percentage splits). In some cases this assumption will not be entirely correct. In the example of unemployed persons, within the region there may be more concentrated areas with a larger proportion of unemployed persons. This assumption should therefore be considered when interpreting datasets that have been concorded.

Queensland

Queensland figures include the 'Migratory - Offshore - Shipping' and 'No Usual Address' counts.

Region overview

Statistics in the region overview have been derived from administrative geographical boundaries and the Bureau of Meteorology.

Rounding

Figures are rounded to nearest whole number. Calculations (such as percentages and rates) are based on pre-rounded figures.

Specialisation ratio

The ratio of the percentage for the Central Ward to the percentage for Queensland. A specialisation ratio above 1.00 indicates Central Ward has a larger share for that category than in Queensland. Similarly a specialisation ratio below 1.00 indicates Central Ward has a smaller share for that category than in Queensland.

Statistical Area Level 2

Statistical Area Level 2s (SA2s) (2011) are small areas, approximately suburb size, with a population range of between 3,000 to 25,000 persons, and have an average population of about 10,000 persons. There are 526 SA2 regions that cover the state.

Ward

Wards are local government electoral boundaries represented by a single Councillor and the Lord Mayor.

Topic explanatory notes

Aged care services

Community care services

Community care services provide home-based care for older people wanting to remain living independently in their own home improving their quality of life and helping them to remain active and connected to their own communities. The figures here include Mainstream Packaged Care places provided by Community Aged Care Package (CACAP), Extended Aged Care at Home (EACH), and Extended Aged Care at Home Dementia (EACHD) services, and Flexible Care places provided in a community setting by Multi-Purpose Services (MPS), Innovative Care, Consumer Directed Care (CDC), and National Aboriginal and Torres Strait Islander Aged Care (NATSI) Services.

Residential aged care

Residential Aged Care provides a range of supported accommodation services for older people who are unable to continue living independently in their own homes. The figures here include Mainstream Residential Aged Care places provided by Residential Aged Care Services (RACS), and Flexible Care places provided in a Residential setting by Multi-Purpose Services (MPS), and National Aboriginal and Torres Strait Islander Aged Care (NATSI) Services.

Transition care

Transition care program provides a package of services to enable older people after a hospital stay to return home rather than prematurely enter residential care. The program also gives older people and their families and carers time to consider long-term care arrangements.

Births and deaths

Births

Births data are based on the number of births registered during a calendar year by place of usual residence of the mother. This is different to the number of births which occurred during a calendar year. For further information on the differences between estimates of registered births and births occurring in a time period, refer to ABS website (cat. no. 3301.0).

As a result of changes in the timeliness of registration of births in Queensland, care should be taken when interpreting changes in Queensland births between 2006 and 2010. This lag has reduced in recent years, indicating potential improvements in the timeliness of registration of births in Queensland. The December quarter 2009 also saw the Queensland Registry of Births, Deaths and Marriages devoting significant time and resources to follow-up and finalise birth registrations where there was previously incomplete information. As part of the Retrospective Births Project, 1,780 births were registered, with approximately 40% registered as Aboriginal and Torres Strait Islander births (see paragraph 40 of cat. no. 3301.0 explanatory notes for more information). This project is now complete.

Deaths

Deaths data are based on the number of deaths registered during a calendar year by place of usual residence of the deceased. This is different to the number of deaths which occurred during a calendar year. For further information on the differences between estimates of registered deaths and deaths occurring in a time period, refer to ABS website (cat. no. 3302.0).

Business counts

It is not currently possible to account for those businesses which operate out of multiple locations, other than at their main location. This is particularly relevant for larger businesses, which commonly establish outlets in several or all states and many regions across Australia. The reason for this is that data pertaining to individual business locations are not currently available from the Australian Bureau of Statistics Business Register. Users should therefore be aware of this limitation when using counts of businesses included in this table.

Business counts by industry

Based on Australian and New Zealand Standard Industrial Classification (ANZSIC), 2006 edition.

The 'Not classified' industry division is accurate at the time of release of data. Further refinements to this group will be made in subsequent releases, but will not be reflected in these counts.

Country of birth

Based on the most common Country of Birth responses (excluding Australia) reported in the 2006 Census.

Emergency services, schools and hospitals

Fire stations

Does not include Rural Fire Brigade.

Hospitals

Includes both private and public hospitals. Excludes public dental and psychiatric facilities.

Police stations

Does not include Police Beats.

Schools

Includes both private and public schools and centre types of associated facility, campus, community school, non-state school, special campus, special school, specific purpose school, state high school and state school.

Employment by industry

Employment by industry

Based on Australian and New Zealand Standard Industrial Classification (ANZSIC), 2006 edition.

Industry subdivision

The industry subdivision refers to the 2-digit industry classification from the Australian and New Zealand Standard Industrial Classification (ANZSIC), 2006 edition.

Employment by occupation

Employment by occupation

Based on Australian and New Zealand Standard Classification of Occupations (ANZSCO), 2006 edition (Revision 1).

Occupation sub-major group

The occupation sub-major group refers to the 2-digit occupation classification from the Australian and New Zealand Standard Classification of Occupations (ANZSCO), 2006 edition (Revision 1).

Median age

Median estimates have been calculated by the ABS and Queensland Treasury.

Median rent

Medians for regions with less than 10 lodgements in the 12 month period have not been reported.

Median rents do not include lodgements listed with \$0 rent.

Rental bonds data published by QGSO may not be directly comparable with data published by the Residential Tenancies Authority (RTA) due to geocoding of Rental Bonds data by QGSO and updates to bond records, including where additional bond forms are processed by RTA after quarterly data are supplied to QGSO.

Medians and averages

Average household size

Applicable to number of persons usually resident in occupied private dwellings. It includes partners, children, and co-tenants (in group households) who were temporarily absent on Census Night. A maximum of three temporary absentees can be counted in each household. It excludes 'Visitors only' and 'Other non-classifiable' households.

Average number of persons per bedroom

Applicable to occupied private dwellings. It excludes 'Visitors only' and 'Other non-classifiable' households.

Median mortgage repayment

Applicable to occupied private dwellings being purchased and includes dwellings being purchased under a rent/buy scheme. It excludes 'Visitors only' and 'Other non-classifiable' households.

Median total family income

Applicable to families in family households. It excludes families where at least one member aged 15 years and over did not state an income and families where at least one member aged 15 years and over was temporarily absent on Census Night.

Median total household income

Applicable to occupied private dwellings. It excludes households where at least one member aged 15 years and over did not state an income and households where at least one member aged 15 years and over was temporarily absent on Census Night. It excludes 'Visitors only' and 'Other non-classifiable' households.

Median total personal income

Applicable to persons aged 15 years and over.

Non-school qualification by field of study

Excludes persons with a qualification out of the scope of the Australian Standard Classification of Education (ASCED).

Non-school qualification by sex and age

Excludes persons with a qualification out of the scope of the Australian Standard Classification of Education (ASCED).

Population projections

Population projections are based on a medium series.

Proficiency in spoken English

Based on the most common Language Spoken at Home responses reported in the 2006 Census for Australia.

Reported offences

The reference date for reported offences is the date an offence is reported to or detected by police. Data are based on the location in which the offence occurred. Rates are calculated using the Estimated Resident Population (ERP) as at 30 June of the reported financial year. The ERP for the latest year has been linearly extrapolated using the change between the previous two years.

Offences against the person

The offence division of offences against the person includes the following offence sub-divisions: homicide (murder); other homicide; assault; sexual offences; robbery; and other offences against the person.

Offences against property

The offence division of offences against property includes the following offence sub-divisions: unlawful entry with intent; arson; other property damage; unlawful use of motor vehicle; other theft (excluding unlawful entry); fraud; and handling stolen goods.

Other offences

The offence division of other offences includes the following offence sub-divisions: drug offences; prostitution offences; liquor (excluding drunkenness); gaming, racing and betting offences; breach of domestic violence protection orders; trespassing and vagrancy; weapons act offences; good order offences; stock related offences; traffic and related offences; and miscellaneous offences.

Residential lot registrations

Lot registration is the final stage in the development of new residential lots, and it is only after the title is registered that a lot legally exists. Lot registrations data provide an indication of the volume of new lots developed and intended for residential purposes.

The Queensland Government Statistician's Office applies a range of filters to DNRM's computer inventory of survey plans data, such as parcel size and zoning information, to extract the lots registered for residential purposes. 'Urban residential' lots include standard lots typically for detached houses (60m² to <2,500m²) and lots under community titles schemes for units and townhouses. For this monitoring program, 'low density residential' lots are defined as standard lots between 2,500m² and 5 hectares in size.

Total family income

Median total family income estimates incorporate medians calculated by both ABS and Queensland Treasury. Medians are only calculated where there were five or more total families. Median calculation excludes families where at least one member aged 15 years and over did not state an income and families where at least one member aged 15 years and over was temporarily absent on Census Night.

Total personal income

Median total personal income estimates incorporate medians calculated by both ABS and Queensland Treasury.

Unemployment and labour force

Small Area Labour Force data have been generated from a Structure Preserving Estimation (SPREE) methodology using ABS and Centrelink data. As such these estimates can exhibit considerable variability and care should be taken when interpreting these values. For further information on these data, refer to the Australian Government Department of Employment website.
